

Excalibur Soft-Tec™ • The No Salt Water Softener
Choose Salt Free Softness

Is your skin baby soft?

Choose *Salt Free Softness*

Soft water is gentle, beautifying, enriching. Soft water means soft, clean skin; soft, silky, more manageable hair. Hard water keeps soap from lathering as it might, working as it should, rinsing off as you want it to. It often leaves an invisible film which blocks pores, attracting and holding dirt and bacteria, causing chapping, itching, and dryness. Hair washed in hard water becomes limp and lifeless; hair coloring frequently does not penetrate evenly.

Water that has been softened, however, eliminates these problems. It enables you to use lesser quantities of soap, shampoo, and skin care products, and increases the efficiency with which they work.

Choose *Salt Free Softness*

Soft-tec™, the no salt water softener is environmentally friendly as no chemicals or water softening salt are used at anytime that reduces the water contamination in the environment. The important health advantages of the calcium and magnesium remain intact and are available to your body for nutrition. Since the Soft-tec no salt water softener doesn't use water softening salt of any kind it reduces the sodium in your family's diet.

Soft-tec™, the no salt water softener will soften your household water in either cold or hot water, the small calcium crystals are rinsed away by the water flow.

Soft-tec™, the no salt water softener a revolutionary technological advancement for the treatment of hard water that converts water hardness minerals into calcium crystals from positive ions. These calcium crystals are neutral and cannot stick to any surfaces eliminating calcium buildup in household appliances, plumbing fixtures and piping systems in your home.

Benefits:

- ◆ no water softening salt to purchase
- ◆ no electricity cost
- ◆ no operating cost
- ◆ essential body nutrients in your water remain intact
- ◆ environmentally friendly, no chemicals or salt required

SUPERIOR MODEL

System Benefits:
